Specialized support to maintain high availability and reliability of SAG mill ring motors

Newly integrated into Metso's robust service portfolio, A&CA is a team of electromechanical and electrical experts that provide 24/7 remote and on-site services for gearless drive systems. Specialized in plant automation controls and electrical drives, A&CA provides support in four key areas:

Technical assistance

- Comprehensive preventive and corrective maintenance
- Commissioning services, regular system inspections
- Cryogenic cleaning
- Overhaul
- Specialized emergency support in the field
- Control system training for gearless drive technology

Project execution

- Commissioning of high power engines
- Modernization of control systems
- Control systems optimization

Online monitoring

- 24/7 support line - emergency telephone assistance with quick and reliable access to expert know how
- Remote monitoring and diagnosis with augmented reality
- Detection of deviations and failures

Product integration

- Monitoring and diagnostic products
- Remote control systems with Wi-Fi connection

- ✓ 20+ years supporting customers in Chile, Argentina, Brazil, Mexico, Peru, Bolivia, Zambia, Australia and more
- ✓ Focused on gearless mill drives system
- ✓ Scheduled, on-demand, and emergency services
