

Metso

Maintenance kits

Application

Easy to order parts kits optimized to match your equipment maintenance interval and guarantee optimal crushing performance. Available for C, HP hundreds, GP, MX & NP crushers and LT, ST & NT mobile plants.

Do you know what parts you need for your next maintenance to ensure high crusher uptime? You can now get all the parts for your 250, 1,000 and 2,000 hour preventive maintenance in convenient, cost-efficient parts kits.

Efficient management of parts inventory

Mining and aggregates producers are constantly looking for ways to reduce operating costs. One effective way is to perform preventive maintenance and efficient inventory management.

By carrying out preventive maintenance, you get the most out of your machine and you can easily plan what parts are needed and when. This way, you don't have to keep parts in stock longer than necessary, resulting in inventory savings.

Best value for the money

Metso has developed parts kits to make your maintenance easier and more efficient, thereby ensuring your crusher's operating performance. With one order you get all the necessary parts, perfectly matched to your machine's preventive maintenance needs.

Our kits are designed according to the exact specifications of your machine, and thus are a perfect fit.

Single sourcing

When acquiring our OEM parts kits, you are sure to get exactly the parts you need, nothing more or less. And since all the parts are dispatched by the same sender in a single kit, there's only one item to keep track of.

Getting the most out of your crusher

Carrying out preventive maintenance and using OEM parts extends the life of your crusher and gives you a better return on investment the day you decide to sell it. Metso's long-lasting parts are designed according to original tolerances to ensure a perfect fit and safe operation.

Benefits

- Ensures the best performance for your crusher
- Fewer parts in inventory
- Higher resale value of your machine
- Specifically designed to fit your crusher
- Reduced costs
- Easy to order

Parts conveniently combined in kits

Maintenance kit contents

Refer to the table below for the kit contents of your machine type for each maintenance interval.

MACHINE	MAINTENANCE KIT CONTENTS	250 H	1,000 H	2,000 H	MACHINE	MAINTENANCE KIT CONTENTS	1,000 H	2,000 H
LT & NT series mobile plants	Breather, feeder unit (vibrator)		•	•	C & NT series jaw crushers	Breather, hydraulic setting adjustment	•	•
	Air filter element, engine	•				Oil filter element, hydraulic setting adjustment	•	•
	Air filter set, engine*		•	•		Crusher drive belts		•
	Oil filter elements, engine	•	•	•	GP series cone crusher	Breather, countershaft	•	•
	Fuel filter elements, engine	•	•	•		Air filter element, compressor unit		•
	V-belts, engine		•	•		Crusher drive belts		•
	Breather / element, fuel tank		•	•		Oil filter elements, lubrication unit	•	•
	Hydraulic oil filter elements		•	•		Breathers, lubrication unit	•	•
	Screen drive belt			•	HP hundred series cone crusher	Crusher drive belts	•	•
	Filter element, water pump		•	•		Oil filter elements, lubrication unit	•	•
ST series mobile plant	Air filter element, engine	•				Breathers, lubrication unit	•	•
	Air filter set, engine*		•	•	NT & NP series impactors	Oil filter element, oil piping assembly	•	•
	Oil filter elements, engine	•	•	•		Oil filter element, hydraulic unit	•	•
	Fuel filter elements, engine	•	•	•		Breather, hydraulic unit	•	•
	V-belts, engine		•	•	MX series cone crusher	Crusher drive belts		•
	Hydraulic oil filter elements		•	•		Oil filter elements, lubrication unit	•	•
	Screen drive belt			•		Breathers, lubrication unit	•	•
	Breather / element, fuel tank		•	•		Air filter element, blower	•	•
						Breather, adjustment mechanism assembly	•	•
						Crusher drive belts	•	•

* includes air filter element and safety cartridge.

When ordering your kit, please indicate serial number of your machine.
